Jackson Joseph

AI/ML Engineering Student | Machine Learning & Full-Stack Development

Mangaluru, Karnataka, India | +91 9353287230 | jacksonjoseph9480@gmail.com

GitHub: github.com/jacksonjoseph9480-sketch | LinkedIn: linkedin.com/in/jacksonjoseph

PROFILE

3rd-year B.E. Computer Science (AI & ML) student at AJIET, Mangaluru, building end-to-end ML and full-stack applications in Python. Seeking Software Engineering, Data Science, or AI/ML internship opportunities.

EDUCATION

Bachelor of Engineering — Computer Science (AI & ML) October 2024 – August 2028

AJ Institute of Engineering and Technology (AJIET), Mangaluru CGPA: 7.6

PERSONAL PROJECTS

Fake News Detection System | github.com/jacksonjoseph9480-sketch/fakenews-detection

Tech Stack: Python, Scikit-learn, TF-IDF, Logistic Regression, FastAPI, React, Vite, NewsAPI

- Built a classifier that takes a news headline or article and predicts Fake or Real with a confidence score, using a TF-IDF + Logistic Regression pipeline trained on the combined Fake.csv/True.csv datasets (35,918 train / 8,980 test samples).
- Reached ~98.5% accuracy on a held-out test split (F1: 0.99 Fake, 0.98 Real).
- Developed a FastAPI backend (deployed on Render) exposing /health, /predict and /live-news endpoints, with a React + Vite frontend.
- Integrated NewsAPI so users can run the trained model on live news articles.

DocuMind AI — Document Analysis System | github.com/jacksonjoseph9480-sketch/documind-ai

Tech Stack: Python, Streamlit, pdfplumber, pypdf, Pydantic v2, SHA-256, pytest

- Built a system that ingests PDF and DOCX files into a canonical, page-aware domain model using a Parser Registry/Factory architecture (pdfplumber primary, pypdf fallback).
- Implemented DOCX structural parsing (page breaks, embedded tables, document properties) and SHA-256 fingerprinting to avoid duplicate processing.
- Developed a Streamlit dashboard with Page Explorer, metadata inspection, full-text view and JSON export, validated with Pydantic v2.
- Wrote a pytest suite for the parsing pipeline, designed for future RAG-based document analysis.

CERTIFICATIONS

- **AI Tools Workshop** — AI Productivity, Workplace Automation, AI Business Applications, AI Workflow Optimization

PROFESSIONAL SKILLS

Languages:	Python
ML / Data:	Scikit-learn, TF-IDF / NLP
Web / Frameworks:	FastAPI, React, Vite, Streamlit
